PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with hands-on experience building and deploying production-grade web applications using the MERN stack, Next.js, and TypeScript. Proven ability to design scalable REST APIs, implement JWT authentication, document APIs with Swagger, and manage CI/CD pipelines via GitHub Actions. Seeking a junior to mid-level role where I can deliver impactful software and grow within a dynamic engineering team.

WORK EXPERIENCE

Full Stack Web Developer

Nuex Solutions · Rahim Yar Khan, Pakistan · Aug 2025 – Present · Full-Time

- Develop and maintain full-stack web applications using Next.js, TypeScript, Node.js, Express.js, and PostgreSQL
- Build responsive, accessible frontends with React.js, Tailwind CSS, and RTK Query for efficient API statemanagement
- Design and document RESTful APIs using Swagger/OpenAPI, ensuring clear contracts between frontend andbackend teams
- Implement JWT-based authentication and role-based access control across multiple production applications
- Manage version control and set up CI/CD pipelines through GitHub Actions, streamlining deployment workflows
- Test and validate API endpoints using Postman; apply OOP principles in backend architecture

PROJECTS

Rideshare · Company Project

Next.js · TypeScript · Tailwind CSS · Node.js · Express.js · PostgreSQL · RTK Query · JWT · Postman · Aug 2025 – Nov 2025

- Built a production-ready full-stack ride-sharing platform with Next.js (TypeScript) frontend and Node.js/Expressbackend
- Architected PostgreSQL database schema with complex relational queries and data persistence for ride and user management
- Integrated RTK Query for optimised API data fetching, caching, and synchronisation across the frontend
- Applied OOP principles in backend service layer; secured all routes with JWT authentication
- Validated 15+ API endpoints using Postman; deployed application with fully responsive UI

SuthraPunjab · Company Project

React.js · JavaScript · Tailwind CSS · Axios · Node.js · Express.js · MongoDB · Mongoose · Swagger · JWT · Jun 2025 – Jul 2025

- Developed a full-stack e-commerce dashboard supporting 200+ product listings with dynamic filtering and cart management
- Implemented Context API for global state management covering cart, auth state, and user sessions
- Documented all backend REST APIs using Swagger/OpenAPI — reducing frontend-backend integration time significantly
- Built MongoDB/Mongoose data models with aggregation pipelines for product and order analytics
- Managed async data fetching with Axios; secured login/signup flow with JWT authentication
